Each district has an administrative office open to the public Monday through Friday from 8 a.m. to 5 p.m. For questions about your service, or to set up a new service, call waste management customer service Monday to Friday, 7am - 5pm, and Saturday 8am - 11am. Waste Management of North County/Coast Waste Management operates two purchase and recycling centers. These centers help locals in Carlsbad, Del Mar, Oceanside Solana Beach and other regions of North County keep our communities clean by adopting recyclables such as aluminum, glass and plastic in exchange for cash, as well as e-waste and household batteries. If you are looking to redeem your cans and bottles for CRV, visit our buyout and recycling centers at the following locations. For all sites, please contact customer service at 1 (800) DUMPSTER with any questions. For more information on the safe disposal of HHW, please visit the Home Hazardous Waste Collection Facility (HHW) website. Featured in this month's Blue Envelope View Print Mailer Ecology Oceanside Recycling Center is fully equipped to receive and process CRV and scrap metal. Our recycling facility is located at 1030 Airport Rd. in Oceanside. Our recycling center equipment accepts the following CRV materials: Aluminum Cans - Clean & Dry plastic glass This recycling facility buys ferrous and non-ferrous metals such as: Aluminum steel iron copper brass Tin You scrap it we buy! We pay the highest possible rates for scrap metal. Just call us: 760-722-1917 Ecology Recycling Center in Oceanside serves the city of Oceanside and surrounding tri-city areas, including Carlsbad, Vista, Camp Pendleton North, Pala Mesa, San Marcos, Bonsall, Escondido, Encinitas and San Luis Rey. We can deliver and pick up roll-off baskets of different types and sizes to recycle your scrap metal. At our Oceanside recycling centre, we recycle various recyclable materials, including CRV items such as aluminum cans, plastic bottles, glass and bi-metal products. Recycling these items to free up space in your business or residential property, and is environment by enabling the reuse the material instead of throwing these items in the trash. Benefits of Recycling Up your share of environmental saving by recycling. The advantages of recycling your items are: Recycling helps protect the environment. Recycling reduces combustion ash. Contamination and pollution can be significantly reduced through recycling, partly because these items do not end up in the bin, but also because fewer new materials are needed to create new items. The use of new materials often requires activities such as mining and other production processes that increase greenhouse gas emissions. Everyone in Oceanside and surrounding areas has a duty to recycle CRV items as their contribution to the care of our planet Earth. In addition to providing access to recycling centers, ecology is constantly trying to use the latest, most environmentally friendly techniques in our processes. What does CRV mean? CRV stands for California Redemption Value, a regulation that is in place to encourage California residents and businesses to recycle certain items. These items include soda, beer and juice cans, cans of vegetable juice, wine and beer bottles, plastic bottles and more. All of these items can be matched for compensation at our Oceanside Recycling Center. As a consumer, you pay for packaging, which you then dispose of. You can make money back through recycling. Bring a large amount and the redemption of your recyclables will be greater, so your journey is worth it. In addition, you will gain satisfaction from knowing that you are doing your part to help the environment. What counts as scrap? Scrap metal includes all metals that are no longer useful. From appliances to wheel frames, window frames and industrial scrap, all these items are counted. Scrap is usually divided into categories between ferrous and ferrous metals. Ecology's Oceanside recycling centre buys both ferrous and non-ferrous metals. The difference between ferrous and unearple metals What is the difference? Ferrous metals contain iron or steel and are magnetic. Some common sources of ferrous metals are scrap from vehicles, scrap demolition site, some old appliances, structural steel and metals compensation from manufacturing warehouses and industries. These metals are usually easier to process, which means they are also worth less than iron-ferrous metals. Non-ferrous metals do not contain iron or steel and are also not magnetic. These metals typically command higher recycling prices. Some metals that you find categorized as non-ferrous metals include aluminum, copper, brass and stainless steel. Sources of these metals include window frames, cars, bicycles, taps, handles, wires, some appliances and kitchenware. Stainless steel is also considered non-ferrous metal, which is an exception to the rule that these metals usually do not contain iron or steel. At Ecology, we want to make recycling as easy as possible. Let us deliver Pick up roll-off baskets of different types & sizes to recycle your scrap metal when you have a large amount, or if your company regularly needs to dispose of large amounts of scrap metal. In all our locations, including Oceanside, we strive to make recycling as simple and hassle-free as possible. Call us with any questions. We are happy to serve you. Being the best recycling center in Oceanside, California Oceanside is a city with a beautiful coastline in San Diego County. While Oceanside doesn't have a large manufacturing sector, there are many factories in the area that can produce some scrap metal. However, residents in the area also use our oceanside recycling center to turn to everything from old appliances, automotive scrap metal, and CRV items. All scrap metal and CRV from the tri-urban area can be recycled in our recycling facility. Ecology supports all recycling efforts in the region through our recycling centre and our positive interactions with the community. We believe that all efforts to provide high-quality and convenient recycling services are essential for environmental care. Recycling centres are a key part of waste management systems and provide an environmentally friendly way of disposing of CRV and metal objects. Through the Ecology Recycling Centre in Oceanside, residents of the area and businesses have easy access to recycling, so these better choices are made in relation to waste management. Waste.
